START USING MINI DRONE

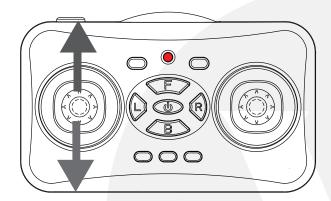

1) Switching On/Off

- a) Switch on the mini drone by pushing the On/Off switch located at the back of the mini drone.
- b) Switch on the controller by pressing onto the On/Off switch. The indicator will be red.

2) Pairing the controller to the mini drone

a) After switching both the mini drone and controller on, push the left control lever all the way up (there will be a beep) and down (there will be another beep). The mini drone and controller is now connected.

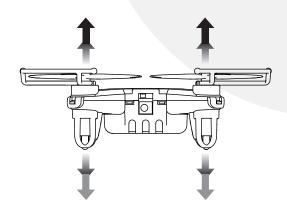

After it is connected, your left control lever acceleration is on zero.

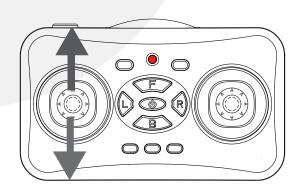

3) Operating the mini drone

a) Hovering up and down

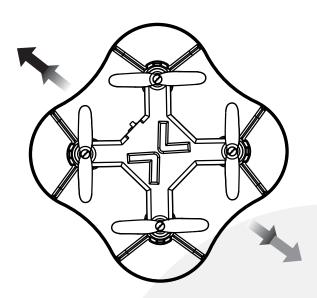

Push left control lever up or down, the mini drone flies upward or downward.

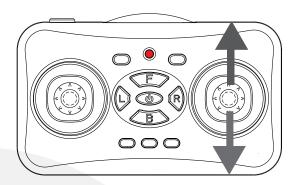

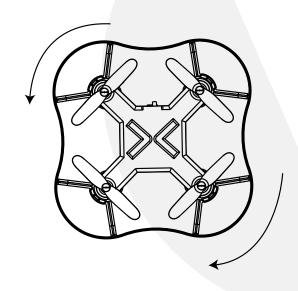

b) Forward and backward

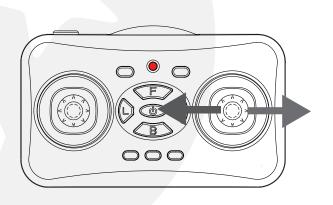

Push right control lever up or down, the mini drone flies forward or backward.

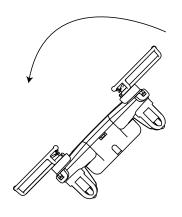

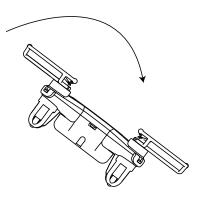

c) Rotating clock-wise and anti clock-wise

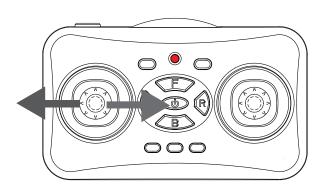

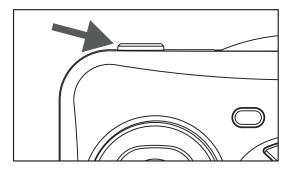

d) Side to side

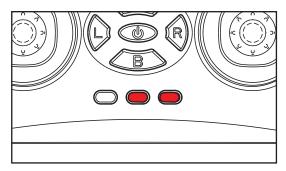

d) Changing speed

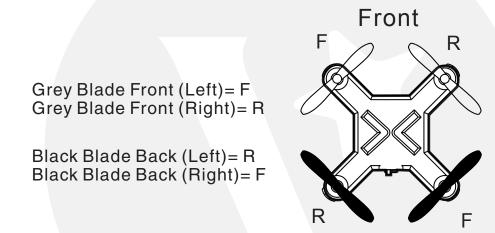

Press the button on the top left of the controller to set the speed for the drone.

The 3 LED indicator located at the bottom of the controller will tell you the speed of the drone.

4) Replacing the propeller blade

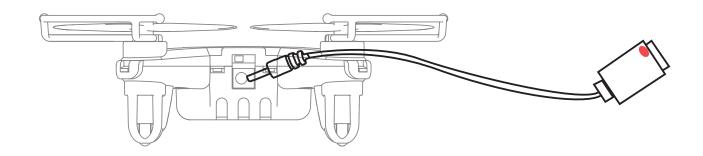

When replacing the propeller blades, make sure to match both the colour of the blades and the letter indicated at th bottom of the blade.

5) Charging the mini drone

Charge the mini drone via the usb charging cable provided. The charging indicator lid red to show that charging is in progress.

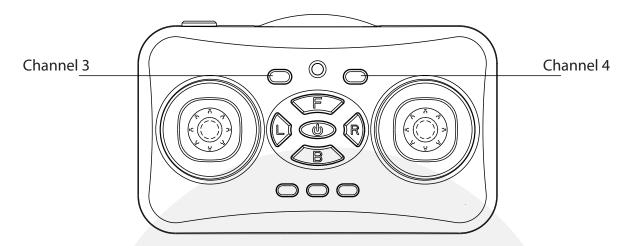

Note: Average charging time is approx. 25-40 minutes. The mini drone operates for approx. 6-8 minutes.

6) Changing channels

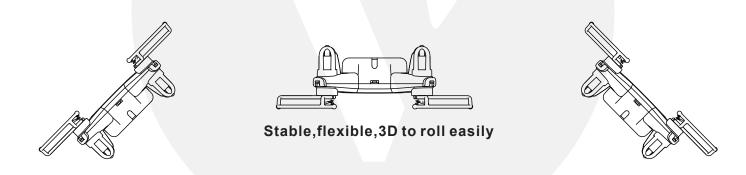

Short press onto the channel 3 button located on the controller, there will be 3 beeps to indicate connected.

Short press onto the channel 4 button located on the controller, there will be 4 beeps to indicate connected.

7) Stunt flying

Fly the mini drone more than 2 meters high, press and hold the stunt button the push the control lever of forward/backward or side/side. The mini drone can roll over.

Trouble Shooting During Flight

Situation:

After mini drone is switched on, the LED indicators keeps flashing, no response when operating.

Cause:

- a) Unable to pair to transmitter
- b) Mini drone battery is insufficient

Solution:

Pair remote controller and mini drone when battery is fully charged.

Situation:

Blades continue to spin after landing.

Cause:

Accelerating control lever is not on the lowest position.

Solution:

Make sure accelerating control lever is on the lowest position.

Situation:

The mini drone keeps turning after trim/has inconsistent speed during left/right turn.

Cause:

- a) The blade is not packed in place.
- b) Blades are deformed.
- c) Blades do not match code.

Solution:

Replace the blades and make sure to place it in the right front/back position.
